Type	ISIN	Kind	Form*	Number	Face value
Ordinary shares	SK1110001270	Registered	Book-entered	100 200 pcs	€ 399
Ordinary shares	SK11100013671	Registered	Book-entered	100 200 pcs	€ 67
Ordinary shares	SK1110014927	Registered	Book-entered	701 400 pcs	€ 5
Ordinary shares	SK1110015676	Registered	Book-entered	14 705 882 pcs	€ 1
Ordinary shares	SK1110017037	Registered	Book-entered	24 000 000 pcs	€ 1
Ordinary shares	SK1110017508	Registered	Book-entered	22 257 415 pcs	€ 1
Ordinary shares	SK1110019579	Registered	Book-entered	115 609 441 pcs	€ 1

\*all shares are book-entered in the Central Securities Depository of the Slovak Republic

### Number of Employees

	30.9.2021
<b>Average number of employees, of which:</b>	<b>792</b>
Average number of managers	6

As at 30 September 2021, Prima banka had 788 employees (31 December 2020: 821).

## 2. Basis for the Preparation of Financial Statements

The key accounting principles applied for the preparation of these financial statements are outlined in the text below:

### Purpose of Preparation

The purpose of preparing these separate financial statements in the Slovak Republic is to comply with Act on Accounting No. 431/2002 Coll. as amended. Prima banka prepares its separate financial statements under special regulations - Regulation (EC) 1606/2002 of the European Parliament and of the Council on the Application of International Financial Reporting Standards (hereinafter "IFRS"). The financial statements are intended for general use and information and are not intended for a specific user or the consideration of any specific transactions. Accordingly, users should not rely exclusively on these financial statements when making decisions.

The Bank's separate financial statements for the previous reporting period (as at 31 December 2020) were approved and authorised for issue on 3 March 2021 and subsequently approved on 29 April 2021 by the General Meeting.

### Basis of Presentation

The separate financial statements of the Bank (the "financial statements") for the 9 months ended 30 September 2021 and comparative data for the 9 months ended 30 September 2020 have been prepared in accordance with IFRS as adopted by the European Union (the "EU") in Commission Regulation (EC) 1126/2008, and current interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

Commission Regulation (EC) 1126/2008 of 3 November 2008 was issued to integrate all standards and interpretations issued by the International Accounting Standards Board (hereinafter "IASB") and the International Financial Reporting Interpretations Committee (hereinafter "IFRIC") that have been fully adopted for use in the Community as at 15 October 2008, except for IAS 39 relating to the recognition and measurement of financial instruments in a single document. Commission Regulation (EC) 1126/2008 of 3 November 2008 replaces Commission Regulation (EC) 1725/2003 of 29 September 2003.

IFRS, as adopted by the EU, do not currently differ from IFRS as issued by the IASB, except for certain requirements for portfolio hedge accounting under IAS 39, which has not been approved by the EU. Prima banka has determined that portfolio hedge accounting under IAS 39 would have had no impact on its financial statements had it been approved by the EU at the balance sheet date.

### Application of amended and new IAS/IFRS

The Bank applied all Standards and Interpretations issued by the International Accounting Standards Board (the IASB) and the International Financial Reporting Interpretations Committee (IFRIC) of the IASB applicable for the accounting periods starting 1 January 2020 as adopted by the European Union ("EU") that are relevant to the Bank's operations:

### Basis for the Preparation of Financial Statements

The financial statements were prepared using the accrual basis of accounting, i.e. the effects of transactions and other events are recognised by the Bank when they occur. Transactions and events are reported in the financial statements for the periods to which they relate.

The financial statements have been prepared under the assumption that the Bank will continue its operations as a going concern in the foreseeable future. The financial statements have been prepared under the historical cost convention; except for the following cases, which are measured at fair value:

- Financial assets/liabilities held to trading, including derivatives,
- Financial assets/liabilities at fair value through profit or loss,
- Financial assets at fair value through other comprehensive income.

The reporting currency used in these financial statements is the euro ("€"). Value figures are presented in thousands unless stipulated otherwise. Value figures in brackets represent negative values. Tables in these financial statements may contain rounding differences. If necessary, comparative data was reclassified to ensure the comparability of presented data.

### Segment Reporting

Due to the fact that the internal management of business activities of the Bank is not divided into operating segments with a specific approach, the Bank does not publish information on segments according to *IFRS 8 Operating segments*.

### 3. Significant Accounting Procedures

#### a) Transaction Date

The transaction date with respect to the purchase and sale of financial assets and liabilities such as term deposits, securities, and derivatives is the date when the deal is arranged. On such a date it is recognised in the off-balance sheet accounts. On the settlement date, the entry on the off-balance sheet accounts is reversed and recognised on the balance sheet accounts.

#### b) Transactions in a Foreign Currency

Transactions made in a foreign currency are translated to euros using the reference exchange rate determined and announced by the European Central Bank (ECB) on the date preceding the transaction date. Assets and liabilities denominated in a foreign currency are translated to euros as at the reporting date using the exchange rate valid as at the reporting date. Exchange rate gains/(losses) from all foreign exchange transactions are included in the statement of comprehensive income item "*Net trading income*".

#### c) Cash and Balances with Central Banks

Cash and balances with central banks comprise cash held, and cash balances with the National Bank of Slovakia (NBS), including the compulsory minimum reserve. The compulsory minimum reserve with the NBS is a required deposit with restricted drawing to be held by all commercial banks licensed in the Slovak Republic.

#### d) Cash and Cash Equivalents in the Statement of Cash Flows

Cash and cash equivalents consist of cash on hand, asset balances on correspondent banks' accounts and cash deposits with the NBS, which are considered to be liquid, i.e. their maturity is up to three months. This category does include the minimum compulsory reserves held with the NBS, whose use (drawing) is restricted, however, they can be used if liquidity is required.

#### e) Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. With effect from 1 January 2018, the Bank classifies financial instruments based on the business model for management of financial instruments in accordance with its investment strategy and differentiates the following categories of financial instruments:

- Financial assets/financial liabilities measured at amortised cost (AC);
- Financial assets/financial liabilities measured at fair value through profit or loss (FVTPL);
- Financial assets measured at fair value through other comprehensive income (FVOCI).

#### Business model assessment

- Classification of financial assets into separate groups or portfolios based on their management;
- Identification of the objectives which the Bank uses to manage each group or portfolio;
- Based on such objectives, the Bank classifies each group or portfolio of financial assets into the relevant business model;
- For assets classified as held to collect contractual cash flows, an assessment of the correct classification based on the analysis of the cash flows characteristics (the SPPI test "Solely payments of principal and interest").

The Bank has the following business models:

- Loan and investment portfolio (financial assets held only to collect contractual cash flows);
- Portfolio for trading (mainly derivatives);
- Equity share portfolio;
- Hedging portfolio.

#### Contractual cash flows

The Bank assesses whether contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (under a standard loan agreement, consideration for the time value of money and credit risk are usually the most significant elements of interest). However, in such an agreement, interest may also include consideration for other basic risks (i.e. liquidity risk) and expenses (i.e. administrative expenses) related to holding a financial asset over a certain period. Interest may also include a profit margin which is consistent with the standard loan agreement.

The time value of money is the element of interest that only provides consideration for the passage of time, i.e. the time value of the money element does not provide consideration for other risks or expenses related to holding a financial asset.

### **Financial assets measured at amortised cost**

Financial assets are measured at amortised cost if both of the following conditions are met:

- The financial asset is held in a business model whose objective is to hold financial assets to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

In this business model, the Bank holds the following financial assets:

- Loans and receivables;
- Debt securities;

i.e. non-derivative financial instruments with fixed or determinable payments and maturity.

Loans and receivables are measured at amortised cost using the effective interest rate less provisions. Upon signing a loan agreement, a confirmation on the provision of a credit facility is recognised in the off-balance sheet accounts on the trade date. On the date the funds are drawn, the loan is reclassified to the statement of financial position. The unused portion of the loan recognised in the off-balance sheet accounts represents for the Bank, contingent liabilities with an inherent credit risk for which the Bank records a provision and a reserve. Provisions and reserves are recorded for off-balance sheet liabilities, such as unused credit facilities, issued bank guarantees, and letters of credit.

Debt securities are mainly securities issued by the government, or other securities of good quality, which the Bank intends to hold to maturity. They are also measured at amortised cost using the effective interest rate and potential impairment is reflected in provisioning. Interest income, discounts and premiums are accrued on a daily basis and recognised in the statement of comprehensive income line "*Interest and similar income*".

### **Financial assets measured at fair value through other comprehensive income (FVTOCI)**

To classify a financial instrument in this portfolio, both of the following conditions must be met:

- The financial asset is held in a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Bank holds the following financial assets in this business model:

- Equity instruments: shares of companies, in which participation is compulsory for the Bank (S. W. I. F. T. s. c., Belgium and VISA INC., USA). Dividends are recognised in the statement of comprehensive income under "Dividend income". To determine the fair value of these securities, the Bank uses Level 3.

### **Financial assets measured at fair value through profit or loss (FVTPL)**

The Bank holds the following financial assets in this business model: Series C Preferred Stock of VISA INC., USA.

In the statement of income, the profit or loss effects of financial assets measured at FVPL are split into dividend income and fair value gains and losses. The dividend income is presented in the line "*Dividend income*".

The fair value gains or losses are reported in the "*Gains/losses from financial Instruments measured at fair value through profit or loss*". To determine the fair value of these securities, the Bank uses Level 3.

### **Impairment of financial assets measured at amortised cost and fair value through other comprehensive income**

The calculation of expected credit losses requires the use of accounting estimates and judgments. For expected credit losses, the Bank recognises a provision for financial assets measured at amortised cost and at fair value through other comprehensive income as at the reporting date. Provisions are recognised in the statement of financial position.

The Bank measures expected credit losses to reflect:

- The unbiased and probability-weighted amount of a loss that is determined by assessing various possible outcomes;
- The time value of money;
- Reasonable and supportable information about past events, current conditions and forecasts of future economic conditions available as at the reporting date without unreasonable costs or disproportionate effort.

IFRS 9 sets a 3-stage impairment model that is based on changes that have occurred in credit quality since the initial recognition date, i.e. a financial asset must be monitored over its full lifetime.

Upon its initial recognition, a financial asset is classified in stage 1. At this stage, a financial asset is measured at a provision equal to a 1-year expected credit loss.

If a significant increase in credit risk is subsequently identified since the initial recognition without the asset being impaired, the asset is moved to stage 2. If a financial asset is credit-impaired, it is classified in stage 3. In stages 2 and 3, a financial asset is measured at a provision equal to the expected credit loss over the full lifetime of the asset.

If the impairment of a financial asset was measured in an amount equal to expected credit losses over the asset's full lifetime in the previous reporting period, but such conditions are not met as at the current reporting date, the Bank measures the impairment loss in an amount equal to a 1-year expected credit loss as at the current reporting date.

The assessment of a financial asset's credit risk is based on the estimates as to the determination of the probability of default (PD), exposure at default (EaD) and loss given default (LGD).

The assessment of credit impairment is performed on a collective or individual basis.

At each reporting date, the Bank assesses whether there has been a change in the risk of default over the expected lifetime of a financial asset since the initial recognition by comparing the risk of default at the initial recognition to the risk of default as at the reporting date, taking into account reasonable and supportable information.

#### Significant increase in credit risk

The assessment of significance comprises future-focused information and is always performed as at the reporting date. Receivables in portfolios measured solely using statistical models are classified in stage 2 if the client has at least one significant receivable overdue by more than 6 days or the Bank has identified a significantly high risk of repayment of the client's receivables in connection with a significant reduction or loss of income. Other receivables are classified in stage 2 on an individual basis.

A decision to change the classification and the required coverage amount, if any, is made by the Credit Committee for individually assessed cases based on a monthly review when individual cases are discussed. The review process includes consultation on the opinion of the responsible approval department that expertly and comprehensively assesses the condition of the counterparty and change thereof.

#### Defaulted financial assets

A financial asset is in default if:

- The debtor is in arrears with material receivables whose contractual instalments are overdue by more than 90 days;
- It is likely that the debtor will not repay its liabilities in full without the Bank taking action, such as realisation of the collateral.

The above criteria are applied to all financial assets held by the Bank and are compliant with the definition of default used for internal credit risk management purposes.

#### **Probability of default**

Probability of default is a risk parameter determining the probability that a debtor will fail to repay its financial liability over the next 12 months, or over the remaining lifetime of the liability. Hence, it is the probability that an exposure not in default will default within 12 months, or over the remaining lifetime.

#### **Loss given default**

Loss given default is a risk parameter defined as the difference between the value of 100% and the value of the recovery rate at the moment of completion of the debt collection or its write-off. Loss given default represents the Bank's expectation in terms of the loss on a defaulted exposure.

#### **Exposure at default**

Exposure at default is the volume of funds the Bank expects will be due at the time of default over the next 12 months, or over the remaining lifetime. The assumption of an early repayment of a debt is also taken into consideration in the calculation.

## Collateral

The Bank primarily accepts the following types of collateral:

- Immovable assets;
- Movable assets;
- Cash collateral;
- Receivables;
- Securities;
- Guarantees.

The Bank uses the following legal instruments:

- Pledge;
- Blocking of cash;
- Security transfer of receivables;
- Security transfer of the right.

The Bank regularly monitors individual types of collateral and, if necessary, revalues them. The methodology of monitoring or valuation, as well as their frequency depends on the type of collateral. The recoverable amount of collateral is derived from the pledge value, up to the amount of the current value of the receivable. The recoverable amount consists of several uncertainties and risks; therefore, the amounts upon realisation of collateral may differ from the estimates, and such a difference may be significant.

When realising collateral, the Bank uses:

- Voluntary auction;
- Foreclosure proceedings;
- Sale of receivables;
- Sale of the pledge over the Bank's receivable in bankruptcy proceedings.

## Write-off of Receivables

The existence of unrecoverable receivables is connected with business risk, which is to a various degree inherent in all banking activities. If a particular receivable meets the conditions for a write-off, Prima banka writes off the receivable directly into expenses in the statement of comprehensive income under "*Net profit/(loss) on write-off of receivables*" and recognised impairment provisions are reversed. Receivables for which the right of collection did not expire continue to be recognised in off-balance sheet accounts. The Loans Committee decides which write-off method will be applied with respect to a particular receivable. When a written-off receivable is collected, income is recognised in the statement of comprehensive income under "*Net profit/(loss) on write-off of receivables*".

## Financial Assets Measured at Fair Value through Profit or Loss

This portfolio consists of financial instruments held for trading, including derivatives used solely to manage position exposures, mainly liquidity risk and currency risk.

Financial assets disclosed in the portfolio at fair value through profit or loss are initially recognised at acquisition cost excluding transaction costs and are subsequently re-valued to fair value through statement of comprehensive income.

The Bank records unrealised gains and losses from the revaluation of these assets to their fair values in the statement of comprehensive income line "*Net trading income*". Interest income from financial instruments at fair value through statement of comprehensive income is accrued on a daily basis and recorded in the statement of comprehensive income line "*Interest and similar income*".

## Financial Liabilities

### Financial liabilities measured at amortised cost (AC)

All of the Bank's financial liabilities, except for derivative financial liabilities, are recognised at amortised cost.

### Financial liabilities measured at fair value through profit or loss (FVTPL)

In this category, the Bank only recognises derivatives with negative values.

## Sale and Repurchase Agreements (Repo Transactions)

A repo transaction is the provision of a loan secured by a security transfer. Securities sold under selling and repurchasing contracts are recognised in the Statement of Financial Position as assets under "*Financial assets at fair value through profit or loss*" or "*Financial assets at AC*". Depending on the nature of the liability, a payment received from counterparty is recognised under "*Due to banks*" or "*Customer deposits*".

Securities purchased under agreements to purchase and resell ("reverse repo transactions") are recognised in the statement of financial position in the account *"Due from banks"* or *"Loans and advances to customers"* as appropriate. Received collateral, which is a security, is recognised in the off-balance sheet accounts from the settlement date until the maturity date of the deal. The difference between the sale and repurchase price is treated as interest and accrued evenly over the life of the repo agreement using the effective interest rate.

### **Derecognition of Financial Instruments**

The Bank derecognises a financial asset only when the contractual rights to the cash flows from the asset expire or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Bank neither transfers nor substantially retains all the risks and rewards of ownership and continues to control the transferred asset, the Bank recognises its retained interest in the asset and an associated liability for amounts it may have to pay.

If the Bank substantially retains all the risks and rewards of ownership of a transferred financial asset, the Bank continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

The Bank derecognises financial liabilities only when the Bank's obligations are discharged or cancelled, or when they expire.

### **Offsetting Financial Instruments**

The Bank only offsets financial assets and financial liabilities if this results from a contractual arrangement and the Bank's intention is to settle an asset and a liability on a net basis, and/or concurrently. Financial instruments subject to offsetting are presented in the statement of financial position in a net amount.

### **The impact of the Coronavirus pandemic**

To mitigate the effects of the Coronavirus pandemic, the National Council of the Slovak Republic adopted new law enabling to clients to request a deferral of instalments for a period of 1 - 9 months. Even during the instalment moratorium, the Bank is entitled to interest on the unpaid part of the loan's principal amount.

In connection with the expected market development, the Bank adjusted the scenarios and weights used to calculate the provision for retail loans. The Bank has also prepared a model for estimating the volume of clients in the deferral phase, for whom the ability to repay liabilities could be reduced.

After the consideration of potential impacts of the Coronavirus pandemic on the business activities the Bank concluded that they have no significant impact on the ability of the Bank to continue as going concern. The Bank very carefully monitors the actual situation around coronavirus pandemic and assesses the potential impact on operations, disclosures, financial position and performance of the Bank.

Allocation of credit loss allowances is affected by the moratoria of instalments related to coronavirus and the Bank will continue to monitor the potential impact and will take all necessary steps to mitigate the negative effects on the Bank, employees and clients.

### **f) Financial Derivatives**

Prima banka's financial derivatives include currency and interest rate swaps and forwards. They are held to hedge risk. In the statement of financial position, they are recognised at fair value under *"Financial assets held for trading – derivatives"* and *"Hedging derivatives"*. An underlying derivative financial instrument is recognised in off-balance sheet accounts on the transaction date. It is derecognised from the off-balance sheet accounts on the date the respective derivative is closed.

Changes in the fair value of derivatives are recognised on the balance sheet accounts to ensure that the positive fair values of derivatives are shown as an asset and negative fair values of derivatives are shown as a liability with a corresponding entry in revenues and expenses recognised in the statement of comprehensive income under *"Net profit from financial transactions"*.

The revaluation of swaps and other derivatives in the Banking Book and the hedging instruments takes place once a month based on their discounted cash flows using the market curves.

### **g) Hedging**

Prima banka is hedged against volatility risk in the fair values ("Fair Value Hedge") of recognised assets, which relates to the risk of interest rate volatility and may affect the Bank's expenses or revenues. Hedged items include long-term loans with a structured interest rate. The gain or loss from the fair value measurement of a hedging instrument is recognised in revenues or expenses. The gain or loss on a hedged item attributable to the hedged risk is recognised in profit or loss and the impact of changes in fair values of hedging instruments and hedged

items on the P/L is insignificant. After 1 January 2018, the Bank continues to apply the accounting policy in line with IAS 39.

#### **h) Fair Value of Financial Instruments**

The fair value of financial instruments classified as stage 1 corresponds to the quoted market price as at the reporting date, without a reduction for transaction costs.

Fair values of financial instruments not quoted in active markets are determined using valuation techniques such as the theoretical price derived from the yield as read from the yield curve of government bonds and the credit margin of issuers' debt securities with comparable credit risk under generally accepted revaluation rules. If practicable, models use only observable data, however, areas such as credit risk, volatilities, and liquidity require expert estimates. Changes in the assumptions related to these factors could affect the reported fair value of financial instruments.

When the discounted cash flows method is used, estimated future cash flows are based on the most accurate management estimates and the discount rate represents the market rate for instruments with similar conditions and maturity. When valuation models are used, input values are based on market values valid as at the reporting date.

Fair values of derivative instruments that are not traded on a stock exchange are derived from the estimated values the Bank would obtain under standard business conditions at the termination of the contract as at the reporting date after considering the market conditions and the creditworthiness of the relevant counterparty.

#### **i) Non-Current Tangible and Intangible Assets**

Non-current tangible and intangible assets are stated at acquisition cost less accumulated depreciation/amortisation together with accumulated impairment losses. Prima banka applies a linear method to depreciate or amortise non-current tangible and intangible assets based on the estimated useful life. Depreciation/amortisation starts in the month in which the assets were placed into service.

Land and works of art are not depreciated.

For accounting depreciation/amortisation of assets Prima banka uses the following depreciation/amortisation periods:

	Depreciation/Amortisation Period in Years
Computers, office tools, cars, etc.	4 - 6
Software	up to 10
Inventory	6 – 10
Office and banking equipment	4 - 12
Buildings and structures	40*

\*The buildings owned by the Bank are depreciated over 40 years, reconstruction work on ATM 10 years, other reconstruction work on leased buildings according to the lease contract; engineering constructions from 12 to 20 years and advertising constructions from 4 to 6 years.

#### **j) Impairment of Tangible and Intangible Assets**

At each balance sheet date, Prima banka reviews the carrying amounts of its non-current tangible and intangible assets to determine whether there is any indication that the assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount is the higher of the fair value less costs to sell and the present value of future cash flows expected to be derived from the asset. If any of the amounts above exceeds the carrying amount, there is no need to estimate the other amount. If the estimated recoverable amount of an asset is lower than its carrying amount, the carrying amount of the asset is reduced to equal the recoverable amount. The impairment loss is recognised directly through the statement of comprehensive income under "*Depreciation*".

#### **k) Leases**

IFRS 16 supersedes International Accounting Standard 17 Leases ('IAS 17') and related interpretations. The Standard eliminates the current dual accounting model for lessees and instead requires companies to bring most leases on-balance sheet under a single model, eliminating the distinction between operating and finance leases. Under IFRS 16, a contract is, or contains, a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. For such contracts, the new model requires a lessee to recognise a right-of-use asset and a lease liability. The right-of-use asset is depreciated, and the liability accrues interest. This

will result in a front-loaded pattern of expense for most leases, even when the lessee pays constant annual rentals. The new Standard introduces several limited scope exceptions for lessees which include:

- Leases with a lease term of 12 months or less and containing no purchase options;
- Leases where the underlying asset has a low value ('small-ticket' leases).

Lessor accounting shall remain largely unchanged and the distinction between operating and finance leases will be retained.

#### **Leases in which the Bank is a lessee**

The new Standard, when initially applied, had a significant impact on the financial statements. Bank recognised in statement of financial position assets and liabilities relating to operating leases for which the Bank acts as a lessee. The Bank recognises new assets and liabilities (impact in amount of € 7,000 thousand) in the statement of financial position for its operating leases in respect of branch and office premises.

#### **l) Assets Held for Sale**

Assets held for sale are non-current assets held to sale for which the carrying amount will be realized through a sale transaction, rather than by using them. These are assets held for sale in their present condition and a sale is considered highly probable. Assets classified as non-current assets held for sale are reported at the lower of acquisition cost less accumulated depreciation and provisions or at fair value less costs related to sale.

#### **m) Income Tax**

Current income tax is calculated on the tax base reported in accordance with Slovak tax legislation. The tax basis differs from accounting profit/(loss) recognized in the statement of comprehensive income, as it excludes items of income or expenses that are taxable or deductible in other years and it further excludes items that are not taxable or deductible. The current tax liability is calculated using the tax rates valid as of the reporting date.

Deferred income tax is reported, using the balance sheet method, for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. The tax rate enacted for future periods was used to determine deferred income tax, i.e. 21%.

A deferred tax liability related to taxable temporary differences represents tax to be paid in future taxation periods. A deferred tax asset is related to deductible temporary differences, the possibility to carry forward the tax loss, and the possibility to transfer unused tax deductions and other tax claims to future periods. Deferred tax liabilities are recognised generally for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilised.

When recognising deferred tax assets and deferred tax liabilities, the Bank applies an approach under which deferred tax assets are recognised to the extent that it is probable that conditions for the tax deduction of temporary differences in the future are met and that taxable profits will be available against which such tax assets can be utilised. Given that the amount of future taxable profits cannot be reliably estimated, the Bank does not recognise the deferred tax asset in full.

Deferred tax is recognised in the income statement, except where the deferred tax relates to items not recognised as income or expense but charged and recognised in equity. In such cases, the related deferred tax is debited or credited to equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to the income tax assessed by the same tax authority and the Bank intends to settle its current tax assets and liabilities on a net basis.

The Bank recognises current corporate income tax and deferred tax in the statement of financial position under "*Tax assets*" or "*Tax liabilities*".

#### **n) Debt Securities**

Debt securities issued by the Bank are stated at amortised cost using the effective interest rate method. The Bank issues mortgage debentures. Interest expense arising on the issue of securities is included in the statement of comprehensive income line "*Interest and similar expenses*".

#### **o) Subordinated Debt**

Subordinated debt refers to the Bank's external funds and, in the event of bankruptcy, composition or the liquidation of the Bank, the entitlement to its repayment is subordinated to liabilities to other creditors. The Bank's subordinated debt is recognised in the separate statement of financial position as "*Subordinated debt*". Interest

expense paid on the received subordinated debt is recognised through the statement of comprehensive income in "*Interest and similar expenses*".

**p) Accrued Interest**

Accrued interest income and expense related to financial assets and liabilities are presented as at the preparation date of the financial statements together with the corresponding assets and liabilities in the statement of financial position.

**q) Provisions for Liabilities**

The amount of provisions for liabilities and charges is recognised as an expense and a liability when the Bank has legal or constructive obligations as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle such an obligation and a reasonable estimate of the amount of the resulting loss can be made. Any loss resulting from the recognition of a provision for liability is recognised in the statement of comprehensive income for the period.

**r) Earnings per Share**

The Bank discloses earnings per share attributable to holders of ordinary shares. The Bank calculated earnings per ordinary share as profits attributable to holders of ordinary shares divided by the weighted average number of ordinary shares outstanding during the period. The profit attributable to each class of shares is determined based on the face value of each class of shares in relation to the percentage of the total face value of all shares.

**s) Interest Income and Interest Expense**

Interest income and expense, and interest related charges arising on all interest-bearing instruments are accrued in the statement of comprehensive income using the effective interest rate method. Interest income (expense) from securities includes revenues from coupons with fixed and floating rates, and amortised discount or premium. Interest on impaired receivables (retail exposures are assessed based on the number of days overdue; other exposures are assessed on an individual basis) is reclassified by the Bank in the off-balance sheet accounts.

**t) Fees and Commissions**

Fees and commissions received and paid are recognised in the statement of comprehensive income as "*Net interest income*" on an accrual basis, eg fees related to the provision of loans, brokerage commissions (are accrued over the term of the respective loan). Other fees and commissions received and paid, eg fees for account management, payment system fees, etc. are recognised in the statement of comprehensive income under "*Net fee and commission income*".

#### **4. Significant Accounting Estimates**

Presenting the financial statements in compliance with IFRS requires estimates and assumptions to be prepared that affect the reported amounts of assets and liabilities and estimated assets and liabilities as at the reporting date as well as disclosed expenses and revenues for the relevant reporting period. The effect of the change in accounting estimates is included, on a prospective basis, in the profit/loss of the period in which the estimate is changed provided that the changes only affect the given period, or also in the profit/loss of the subsequent periods if the change has an impact on the following periods. The estimates relate to: fair values of financial instruments, provisions for loans to customers and provisions for litigations.

##### **Fair Value of Financial Instruments**

If it is not possible to determine the fair value of financial assets and financial liabilities recognized in the statement of financial position from active markets, fair value is determined using by different valuation techniques including mathematical and statistical models. The inputs for these models are taken from observable recognised markets, but if this is not possible, the determination of fair value requires estimates. The estimates include considerations of liquidity and model inputs, eg current interest rates, exchange rates and credit spreads.

##### **Provisions for Loans to Customers**

As discussed in the paragraphs of Chapter 3 above, and as described in detail in Notes 1 and 23, Chapter 5 to the financial statements, the Bank recognises a provision for expected credit losses from financial instruments that are carried at amortised cost or fair value through OCI and identified contingent liabilities. The calculation of provisions is based on anticipated estimated cash flows, which are determined using different scenarios, taking into account the time value of money, supportable and reasonable information about past events and estimated future economic conditions.

The recognition of provisions for loan losses and identified contingent liabilities, however, includes various uncertainties regarding the outcome of the above risks (i.e. for portfolios measured using statistical models, the Bank does not have sufficiently representative historical data available and, therefore, the Bank has elected to use NBS estimates to estimate the impact of an adverse scenario, and requires Bank management to make many subjective judgments when estimating losses. Therefore, the result of such estimates may differ from the provisions recognised as at 30 September 2021.

##### **Deferred Tax Asset**

The utilization of a deferred tax asset depends on the generation of sufficient future taxable profits. Moreover, rules and regulations have undergone significant changes in recent years; there are few historical precedents or interpretative rulings on a number of complex issues affecting the banking industry. In addition, the tax authorities have broad powers when interpreting the application of the tax laws and regulations when examining taxpayers. Accordingly, there is a high degree of uncertainty about the ultimate outcome of examinations by the tax authorities.

##### **Provision for Litigation Claims**

The amounts recognised as provisions for liabilities are based on the Bank's management's judgement and represent the best estimate of the expenses required to settle a liability with uncertain timing and an uncertain amount payable.

Future events and their effects cannot be determined with absolute certainty. Accordingly, accounting estimates require judgement and the estimates that are used in the preparation of the financial statements are changed when new events occur or new information and experience are available, or when the business environment in which the Bank operates changes. Results may differ from these estimates, and the impact can be significant.

## 5. Notes to the Financial Statements

### 1. Financial Assets at Amortised Cost

\*The Bank classifies clients into sectors pursuant to Regulation (EU) No 549/2013 of the European Parliament and of the Council on the European system of national and regional accounts in the European Union, "ESA 2010", where "Public Administration" is sector S.13, "Retail Clients" is sectors S.14 and S.15, and other clients are sectors S.11 and S.12, except for central and other banks.

Compulsory reserves with the NBS represent minimum compulsory reserves the Bank is obliged to maintain in cash with the NBS. The system of creating and maintaining minimum reserves is regulated by European Community and European Central Bank regulations. The Bank's ability to withdraw the reserve is restricted by applicable legislation.

As at 30 September 2021, Prima banka issued the securities summarised in the following table:

ISIN	Date of issue	Maturity date	Frequency of yield payment	Interest rate	Nominal value (€)	Number of securities issued	Carrying amount
SK4120007998	1.12.2011	1.12.2021	-	ZERO	1 000,00	1 465	2 035
SK4000016069	1.10.2019	1.10.2026	annually	0,01 %	100 000,00	5 000	501 564
SK4000019634	14.9.2021	14.9.2027	annually	0,01 %	100 000,00	5 000	501 939
<b>Total</b>							<b>1 005 538</b>

As at 31 December 2020, Prima banka issued the securities summarised in the following table:

ISIN	Date of issue	Maturity date	Frequency of yield payment	Interest rate	Nominal value (€)	Number of securities issued	Carrying amount
SK4120007998	1.12.2011	1.12.2021	-	ZERO	1 000,00	1 465	1 981
SK4000016069	1.10.2019	1.10.2026	annually	0,01 %	100 000,00	5 000	501 753
<b>Total</b>							<b>503 734</b>

Prima banka's issued mortgage debentures are registered book-entry securities. The bonds are readily transferrable with no pre-emption or conversion right attached thereto.

## 10. Liabilities from leases

	30.9.2021	31.12.2020
Liabilities from leases	7 248	7 158
<b>Total</b>	<b>7 248</b>	<b>7 158</b>

## 11. Provisions and Reserves

	30.9.2021	31.12.2020
Provisions for litigation	8 544	8 589
Provisions for off-balance sheet liabilities	3 626	3 861
Other reserves	35	35
<b>Total</b>	<b>12 205</b>	<b>12 485</b>

Provisions for litigation will be used after definitive closing of individual litigations, however, the final date is difficult to predict. Provisions for off-balance sheet liabilities are continuously updated based on the settlement of the obligations.

Movements in provisions for liabilities as at 30 September 2021:

	1.1.2021	Allocation	Release	Use	Exchange rate differences	30.9.2021
Provisions for litigation	8 589	154	0	(199)	0	8 544
Provision for off-balance sheet liabilities	3 861	4 763	(4 999)	0	1	3 626
Other reserves (executions)	35	0	0	0	0	35
<b>Total</b>	<b>12 485</b>	<b>4 917</b>	<b>(4 999)</b>	<b>(199)</b>	<b>1</b>	<b>12 205</b>

Movements in provisions for liabilities as at 31 December 2020:

	1.1.2020	Allocation	Release	Use		31.12.2020
Provisions for litigation	10 131	4 173	(5 679)	(36)		8 589
Provisions for restructuring	952	0	(952)	0		0
Provision for off-balance sheet liabilities	3 553	5 813	(5 505)	0		3 861
Other reserves (executions)	155	17	0	(137)		35
<b>Total</b>	<b>14 791</b>	<b>10 003</b>	<b>(12 136)</b>	<b>(173)</b>		<b>12 485</b>

### Provisions for Litigation

In the ordinary course of business, the Bank is subject to legal actions and complaints. Each dispute is subject to special monitoring and a regular re-assessment as part of the Bank's standard procedures. If it is probable that the Bank will be required to settle a claim and a reliable estimate of the amount can be made, provisions are recorded. The total provision for litigation amounts to € 8 544 thousand as at 30 September 2021 and represents principal and default interest (31 December 2020: € 8 589 thousand).

### Provisions for Off-Balance Sheet Liabilities

The Bank recognises provisions for off-balance sheet loan commitments, granted guarantees, and contingent liabilities. The provisions are assessed by the Bank similarly to loans to customers, reflecting the existing financial situation and activities of the entity to which the Bank granted a guarantee or a loan commitment, and the value of received collateral.

## 12. Other Liabilities

	30.9.2021	31.12.2020
Accruals and deferrals	4 507	114
Reserves and other payables	13 263	15 905
Settlement with employees,	1 124	896
of which: social fund	64	57
Other payables	22 749	15 765
State budget clearing account	353	453
<b>Total</b>	<b>41 996</b>	<b>33 133</b>

Reserves and other payables mainly comprise a provision for employee bonuses, a provision for unused vacation days and a provision for unbilled supplies of goods and services. Other liabilities mainly comprise the settlement of clearing collections and payments.

### Social Fund

Prima banka has created the social fund as required by the Social Fund Act, the Income Tax Act. The social fund is used by Prima banka to finance its own social policy. The social fund is created during the year (if a profit is generated and tax and social security payments fulfilled) by a compulsory allocation at 1% of gross wages effectively paid to employees in the current year. For tax purposes, the allocations to the social fund are included in the expenses to generate, ensure and sustain taxable income. Social policy financing represents short-term employee benefits, which are recognized and disclosed as expenses of the current year.

The creation and use of the social fund as at 30 September 2021 and as at 31 December 2020 is presented in the following table:

Social fund	30.9.2021	31.12.2020
Balance as at 1.1.	57	60
Allocation (from expenses)	117	146
Usage: catering allowance	(110)	(149)
<b>Total</b>	<b>64</b>	<b>57</b>

### 13. Equity

	30.9.2021	31.12.2020
Share capital	226 773	226 773
Share premium funds	71 190	71 190
Legal reserve fund	9 897	8 145
Other capital funds	54 078	54 078
Accumulated other comprehensive income	185	(136)
Profit/(loss) from previous years	2 525	(13 246)
Profit/(loss) for the current year	15 699	17 524
<b>Total</b>	<b>380 347</b>	<b>364 328</b>

### Share Capital

Face value of shares	30.9.2021		31.12.2020	
	No. of shares	in € ' 000	No. of shares	in € ' 000
Number of issued shares with face value of € 399	100 200	39 980	100 200	39 980
Number of issued shares with face value of € 67	100 200	6 713	100 200	6 713
Number of issued shares with face value of € 5	701 400	3 507	701 400	3 507
Number of issued shares with face value of € 1	176 572 738	176 573	176 572 738	176 573
	<b>177 474 538</b>	<b>226 773</b>	<b>177 474 538</b>	<b>226 773</b>

### Accumulated Other Comprehensive Income

	30.9.2021	31.12.2020
Financial assets at fair value through other comprehensive income	577	222
Available-for-sale securities	(314)	(358)
<b>Total</b>	<b>263</b>	<b>(136)</b>

Accumulated other comprehensive income includes unrealised remeasurement of financial assets at fair value through other comprehensive income without an effect on deferred tax. In accumulated other comprehensive income, the Bank also recognises the revaluation amount from the transfer of securities from the available-for-sale financial assets portfolio to the held-to-maturity financial assets portfolio pursuant to IAS 39. The aforementioned reserve is gradually amortised in the statement of comprehensive income until the maturity of the transferred securities.

Accumulated other comprehensive income also includes gains/(losses) on revaluation of the instrument used by Prima banka to hedge against the variability of cash flows for granted long-term loans until June 2011.

**Proposed Distribution of Profit for 2020:**

Statutory allotment to the reserve fund (10% of the profit after tax)	1 752
Transfer of profit into profit/loss from previous years	15 772
<b>Retained earnings for 2020</b>	<b>17 524</b>

The distribution of the 2020 profit was approved by the General Meeting of Prima banka as at 29 April 2021.

**14. Net Interest Margin**

	30.9.2021	30.9.2020
<b>Interest income and similar income on:</b>	<b>47 624</b>	<b>54 196</b>
Financial assets at amortised cost, of which:		
Balances with the central banks	0	(647)
Due from banks	(2)	(2)
Loans and advances to customers	43 304	50 152
Debt securities	4 322	4 693
<b>Interest expense and similar expense for:</b>	<b>(11 121)</b>	<b>(13 153)</b>
Financial liabilities at amortised cost, of which:

\* Including salaries and bonuses to members of the Management Board and Board of Directors.

\*\* Costs of audit and the related services provided by the auditor, included audit of financial statements and audit of NBS prudential returns and other audit services, that related to agreed upon procedures under Act No. 566/2001 Coll. on Securities and Investment services, preparation of Long-form report for NBS, Review of IT security and non-audit services related to the issue of Covered Bonds.

Prima banka does not have pension arrangements separate from the compulsory state pension system of the Slovak Republic. Pursuant to Slovak legal regulations, an employer is obliged to pay contributions to social security, health insurance, medical insurance, accident insurance, unemployment insurance, and contributions to a guarantee fund set as a percentage of the assessment base. These expenses are recognised in the statement of comprehensive income in the period in which the employee was entitled to a salary.

The Bank contributes to a defined contribution supplementary pension plan administered by a private pension fund, based on the employment period of the employee. No liabilities arise to the Bank from the payment of pensions to employees in the future. Supplementary pension insurance expenses amounted to € 86 thousand as at 30 September 2021 (30 September 2020: € 92 thousand).

As of 1 January 2012, Act No. 384/2011 Coll. on the Special Levy on Selected Financial Institutions came into effect. The levy calculation is based on the amount of the Bank's liabilities less the amount of equity and subordinated debt. Data as at the last date of the preceding calendar quarter were used to determine the base for calculating the levy for the relevant calendar quarter. From 1 January 2021, the obligation to pay the special levy of selected financial institutions ceases on the basis of Act no. 353/2020 Coll.

**19. Contributions to the Resolution fund and Deposits protection fund**

	30.9.2021	30.9.2020
Resolution fund	(436)	(355)
Deposits Protection Fund	(1 754)	(212)
<b>Specific Contributions of Selected Financial Institutions</b>	<b>(2 190)</b>	<b>(567)</b>

In addition, pursuant to Act No. 371/2014 Coll., the Bank makes contributions to the national resolution fund, which was established as one of the fundamental elements of the mechanism for the resolution of crisis situations in the financial sector. Contributions to the fund are calculated using the methodology set out in the European Commission's regulations, taking into account the size and risk profile of the financial institution.

The Bank is legally obliged to make a contribution to the Deposit Protection Fund. The annual contribution was determined by the Deposit Protection Fund.

**20. Depreciation and provisions of assets**

	30.9.2021	30.9.2020
Depreciation of tangible assets	(2 862)	(3 069)

<b>Written-off and assignment of receivables*</b>	<b>1 996</b>	<b>1 027</b>
<b>Net Allocation to Provisions and Reserves</b>	<b>(2 202)</b>	<b>(4 537)</b>

\*including write off costs and payment received from written-off and assigned receivables

More information on provisions for losses from loans to customers and provisions for off-balance sheet liabilities is presented in Note 1 and in Note 11 respectively.

**22. Income Tax**

	30.9.2021	30.9.2020
Deferred income tax	0	0
<b>Income Tax</b>	<b>0</b>	<b>0</b>

**23. Net Earnings per Share**

	30.9.2021	30.9.2020
Net earnings for the current period (€ T)	15 699	14 021
Number of issued shares with value € 399	100 200	100 200
Number of issued shares with value € 67	100 200	100 200
Number of issued shares with value € 5	701 400	701 400
Number of issued shares with value € 1	176 572 738	176 572 738
Net earnings per share (face value € 399) in €	27.623	24.669
Net earnings per share (face value € 67) in €	4.638	4.142
Net earnings per share (face value € 5) in €	0.346	0.309
Net earnings per share (face value € 1) in €	0.069	0.062

**24. Information on Statement of Cash Flows**

In respect of the statement of cash flows, cash equivalents include the following items with a maturity of up to three months:

	30.9.2021	31.12.2020
Cash	66 089	67 790
Balances with central banks	13 253	23 606
Current accounts in other banks	2 805	2 597
Term deposits in banks up to 3 months	0	0
<b>Total</b>	<b>82 147</b>	<b>93 993</b>

**25. Contingent Liabilities and Other Off-Balance Sheet Items****Off-balance Sheet Assets**

	30.9.2021	31.12.2020
Receivables from spot transactions	6 096	1
Guarantees received	6 615	6 813
Received collateral from pledge, security and other rights	4 942 886	4 130 699
<b>Total</b>	<b>4 955 597</b>	<b>4 137 513</b>

**Off-balance Sheet Liabilities**

	30.9.2021	31.12.2020
Liabilities from spot transactions	6 275	1
Guarantees issued	6 748	7 250
Loan commitments and unused credit facilities	212 088	183 466
Assets in custody	16 921	12 829
<b>Total</b>	<b>242 032</b>	<b>203 546</b>

The risk associated with off-balance sheet loan commitments, issued guarantees and contingent liabilities is assessed similarly as for loans to customers, and also reflects the financial situation and activities of the entity to which the Bank granted the guarantee as well as the value of received collateral. As at 30 September 2021, provisions recorded for off-balance sheet exposures amounted to € 3 626 thousand (31 December 2020: € 3 861 thousand), see Note 11 in this Chapter.

**Issued Guarantees**

Guarantees issued to customers constitute Prima banka's obligations to make payments when its customers are not able to meet their obligations to third parties.

**Loan Commitments and Unused Credit Facilities**

Loan commitments and unused credit facilities comprise approved but unused amounts of loans and overdraft facilities.

**Assets Received in Custody**

Assets received from clients in custody are not in the Bank's possession and are thus not included in the Bank's assets. Income on securities in custody is recognised in the statement of comprehensive income as *"Net fee and commission income"*.

**26. Residual Maturity of Derivatives**

All derivatives are traded in the over-the-counter market. The summary of derivatives held for trading with positive or negative air values is described in Note 2 of this chapter.

The following summary shows the residual maturity of derivatives' face values as at 30 September 2021:

Residual maturity	Up to 1 year	1 to 5 years	More than 5 years	Total
<b>Financial assets held for trading – derivatives</b>				
Currency swaps	39 685	0	0	39 685
<b>Total off-balance sheet assets</b>	<b>39 685</b>	<b>0</b>	<b>0</b>	<b>39 685</b>
Currency swaps	39 936	0	0	39 936
<b>Total off-balance sheet liabilities</b>	<b>39 936</b>	<b>0</b>	<b>0</b>	<b>39 936</b>
<b>Net derivatives</b>	<b>(251)</b>	<b>0</b>	<b>0</b>	<b>(251)</b>

The following summary shows the residual maturity of derivatives' face values as at 31 December 2020:

Residual maturity	Up to 1 year	1 to 5 years	More than 5 years	Total
<b>Financial assets held for trading – derivatives</b>				
Currency swaps	11 460	0	0	11 460
<b>Total off-balance sheet assets</b>	<b>11 460</b>	<b>0</b>	<b>0</b>	<b>11 460</b>
<b>Financial liabilities held for trading - derivatives</b>				
Currency swaps	11 370	0	0	11 370
<b>Total off-balance sheet liabilities</b>	<b>11 370</b>	<b>0</b>	<b>0</b>	<b>11 370</b>
<b>Net derivatives</b>	<b>90</b>	<b>0</b>	<b>0</b>	<b>90</b>

## 27. Fair Value of Financial Instruments

### Financial Instruments Recognised at Fair Value

The fair value of a financial instrument is the price at which it would be possible to sell the asset or transfer the liability as part of a standard transaction between market participants at the value determination date.

The Bank uses the following hierarchy to determine and disclose the fair value of financial instruments by valuation technique:

- Level 1 - market prices available on an active market for an identical financial instrument;
- Level 2 - if there is no market price, the Bank measures the financial instrument based on a model, which is a quantified estimate based on mathematical or statistical methods or a combination thereof, using market (observable) inputs with a strong impact on their fair value;
- Level 3 - valuation techniques where no observable market data with a significant impact on the fair value exist.

The following table presents an overview of financial instruments recognised at fair value and classified in Levels 1 - 3 based on the determination of their fair values as at 30 September 2021 (as at 31 December 2020):

31 September 2021	Level 1	Level 2	Level 3	Total
Financial assets held for trading: derivatives	0	15	0	15
Financial assets at fair value through profit or loss	0	0	2 178	2 178
Financial assets at fair value through other comprehensive income	0	0	2 197	2 197
<b>Financial assets at fair value total</b>	<b>0</b>	<b>15</b>	<b>4 375</b>	<b>4 390</b>
Financial liabilities held for trading: derivatives	0	261	0	261
<b>Financial liabilities at fair value total</b>	<b>0</b>	<b>261</b>	<b>0</b>	<b>261</b>

31 December 2020	Level 1	Level 2	Level 3	Total
Financial assets held for trading: derivatives	0	95	0	95
Financial assets at fair value through profit or loss	0	0	1 595	1 595
Financial assets at fair value through other comprehensive income	0	0	1 647	1 647
<b>Financial assets at fair value total</b>	<b>0</b>	<b>95</b>	<b>3 242</b>	<b>3 337</b>
Financial liabilities held for trading: derivatives	0	0	0	0
<b>Financial liabilities at fair value total</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>

Financial assets at fair value through other comprehensive income are mainly capital participations in companies providing settlement and card services, whose fair value differs from their carrying amount after revaluation.

The fair value of derivatives is also determined by discounting future cash flows using the relevant yield curves consisting of observable market factors. The reconciliation of fair values of derivatives with a professional counterparty is performed on a monthly basis.

### Fair Value of Financial Assets and Liabilities Reported at Amortised Cost

The calculation of the fair value of assets and liabilities reported at amortized cost is based on the sequence using the prices listed at the beginning of this chapter. This means if there is an available market price, it is used by the Bank, otherwise, the Bank uses the model. The Bank uses a valuation technique based on the discounted future cash flows using observable market interest rates, which are modified for credit spreads. In this way, every

planned cash flow is measured in line with the signed contracts with counterparties. For assets where fair values are available, the fair value is determined in line with them.

The calculation takes into account current interest rates, currency exchange rates, and credit spreads. Interest rates and currency exchange rates are provided by Bloomberg. The curve is projected as follows: for a period of up to one year Money Market rates are applied, for periods of over one year, swap rates are applied. Credit spreads are calculated as a product of PD (probability of default) and LGD (loss given default).

Fair values of financial instruments at amortised cost were determined for the presentation of the financial statements for general use. Information on the fair value of these instruments cannot be used for any specific transaction of purchase or sale of these financial instruments. The users of financial statements should not rely on these financial statements when assessing the fair value of financial instruments at amortised cost as the only source of information.

The following table shows the comparison of fair values and carrying amounts of balance sheet items as at 30 September 2021:

	Carrying amount	Estimated fair value		
		Level 1	Level 2	Level 3
Cash	66 089	0	66 089	0
Financial assets at amortised cost, of which:	5 206 330	163 913	772 282	4 533 795
Balances with central banks	769 477	0	769 477	0

Issued securities	503 734	510 779	2 581	0
<b>Financial liabilities</b>	<b>4 114 294</b>	<b>510 779</b>	<b>3 905</b>	<b>3 643 755</b>

The fair value of cash is the same as the carrying amount.

The fair value of receivables from and payables to banks is given as the present value of discounted future cash flows using observable market factors on the interbank market, including the relevant credit spread. As most of these deposits are short term, their fair value approximates the carrying amount.

The fair value of receivables from and payables to customers is stated similarly as for receivables from and payables to banks. For receivables and payables with fixed interest and a residual maturity of less than one year, and for receivables and payables with a floating interest if the re-fixing period is shorter than one year, their fair value approximates the carrying value.

The fair-value measurement for financial assets at amortised cost is based on an observable market price from Bloomberg. If the market price of a security is not available, the valuation is based on a calculation of the present value of discounted future cash flows using observable market factors on the interbank market, including the relevant credit spread.

The fair value of issued mortgage debentures is calculated as the present value of discounted future cash flows using observable market factors on the interbank market, including the relevant credit spread.

## 28. Capital Management

### Own Funds

Regulatory capital represents Prima banka's own funds intended for covering unexpected losses resulting from financial risks to which the Bank is exposed. It is calculated in accordance with the valid Regulation of the European Parliament and of the Council (EC) No 575/2013 on prudential requirements for credit institutions and investment firms (the "CRR") and serves for the capital adequacy calculation in accordance with the CRR. In accordance with the CRR, regulatory capital must cover particular capital requirements on credit risk of the Trading and Banking Books, market risk of the Trading and Banking Books (interest-rate and currency risks), and operational risk.

The Bank's Management Board is regularly informed of the status and expected development of the adequacy of own funds along with other capital stability parameters which are classified in the Bank's system of risk appetite parameters, and necessary actions are taken on time to comply with the set parameters.

Prima banka's own funds represent a sum of original (Tier 1) and additional own funds (Tier 2) reduced by deductible items. Original own funds consist of paid-up share capital, share premiums, other funds (legal reserve fund, funds created from profit after tax and other capital funds), and retained earnings from previous years. Original own funds are reduced by the net book value of intangible assets and profit/loss to be approved, provided that the loss or loss from previous years was recognized. Additional own funds consist of general credit risk adjustments acceptable as Tier 2 capital.

Prima banka's own funds and regulatory capital requirements as at 30 September 2021 and 31 December 2020 are stated in the table below:

<b>OWN FUNDS</b>	<b>30.9.2021</b>	<b>31.12.2020</b>
<b>Tier 1 capital</b>		
<b>Common Equity Tier 1 capital</b>	<b>364 278</b>	<b>346 576</b>
Capital instruments	297 963	297 963
Paid-up share capital	226 773	226 773
Share premium	71 190	71 190
Capital instruments in Common Equity	0	0
Retained earnings	2 525	(13 246)
Accumulated other comprehensive result	185	(136)
Other funds	63 975	62 223
Intangible assets	(370)	(227)
<b>Additional Tier 1 capital</b>	<b>0</b>	<b>0</b>
<b>Tier 2 capital</b>	<b>25 435</b>	<b>24 483</b>
Capital instruments	0	0
Tier 2 capital adjustments	0	0
General credit risk adjustments (standardised approach)	25 435	24 483
<b>OWN FUNDS TOTAL</b>	<b>389 713</b>	<b>371 059</b>
<b>Adequacy of own funds (%)</b>	<b>17,84</b>	<b>17,60</b>
<b>Own funds requirements to cover</b>	<b>30.9.2021</b>	<b>31.12.2020</b>
Credit risk and risk of impairment of receivables	162 784	156 693
Operational risk	12 006	12 006
CVA risk	10	5

Prima banka met regulatory requirements under the CRR. The Bank uses a standardised approach for the calculation of own funds requirements.

## 29. Risk Management

### 1. Credit Risk

#### a) Information on Credit Risk Policy, Objectives and Management

The fundamental goal of the credit risk management strategy at Prima banka is to optimize the amount of accepted risks in line with the capital coverage amount and to generate sustainable profits over the long-term. The Bank has established a separate organizational unit at the Risk Management Division to identify, measure, monitor, and minimize credit risk and this division is independent from trading and settlements. The whole process is subject to the approved Risk and Capital Management Strategy, which is regularly reassessed in line with changes in the Slovak banking market. Lending is subject to the rules stipulated in the strategy and risk parameters and limits for issuing new loans are strictly observed by members of the credit approval bodies and monitored by the Bank's management, on the basis of regular reporting. Information on customers is permanently monitored and assessed. Customers are assigned to risk segments to ensure correct monitoring, quantification, reporting and management of credit risks. Exposure limits are set for the defined segments. Exposure limits are also set for individual customers.

The following table gives the maximum amount of credit risk net of provisions, without considering the received collateral:

<b>Credit risk related to balance sheet assets:</b>	<b>30.9.2021</b>	<b>31.12.2020</b>
Financial assets at amortised cost	5 206 330	4 416 502
Balances with central banks	769 477	362 257
Due from banks	2 805	2 927
Loans and advances to customers	4 219 504	3 833 646
Debt securities	214 544	217 672
Trading derivatives	15	95
Financial assets at fair value through profit or loss	2 178	1 595
Financial assets at fair value through other comprehensive income	2 197	1 647
Deferred tax assets	9 382	9 382
Other assets	12 644	14 654
<b>Total</b>	<b>5 232 746</b>	<b>4 443 875</b>
<b>Credit risk related to off-balance sheet items prior to the deduction of reserves:</b>	<b>30.9.2021</b>	<b>31.12.2020</b>
Issued guarantees	6 748	7 250
Loan commitments and unused credit limits	212 088	183 466
<b>Total</b>	<b>218 836</b>	<b>190 716</b>

Summary of individual types of received collateral for financial assets in recoverable amounts to cover provided loans:

<b>To cover granted loans</b>	<b>30.9.2021</b>	<b>31.12.2020</b>
Cash	2 561	2 704
Immovable assets	4 936 595	4 122 903
Movable assets	3 730	5 092
<b>Collateral received for financial assets</b>	<b>4 942 886</b>	<b>4 130 699</b>

#### b) Description of Credit Risk Measurement and Monitoring Methods

Credit risk is the fundamental and most significant bank risk; therefore, its management has a critical impact on Prima banka's results. In order to minimize credit risk, Prima banka uses various instruments to collateralize credit transactions and focuses on identifying and handling risks arising in credit risk mitigation. Through its internal procedures, Prima banka defines activities to be performed when valuating and accepting collateral instruments.

Prima banka uses its own rating system to assess customer creditworthiness, which is based on an assessment of the customer's financial and non-financial results. Prima banka has developed a specific system for assessing corporate, municipal, retail and sole trader customers. Customers are assigned to one of 17 risk groups. The credit scores are subject to reassessment and revised as and when needed, based on a decision of the Credit Committee.

Characteristics of individual rating levels are given in the following summary:

Rating	Characteristics
<b>AAA</b>	The highest rated entities with small risk and an extremely strong capacity to meet their financial commitments.
<b>AA+</b> <b>AA</b> <b>AA-</b>	Highly rated entities with very strong capacity to meet their financial commitments, with moderate risk over the long-term. It differs from the AAA rating to a small degree.
<b>A+</b> <b>A</b> <b>A-</b>	Highly rated entities with strong capacity to meet their financial commitments, with recommended monitoring of future risk in the medium- and long-term.
<b>BBB+</b> <b>BBB</b> <b>BBB-</b>	Creditworthy entities with adequate capacity to meet their financial commitments, but susceptible to adverse economic conditions or changing circumstances.
<b>BB+</b> <b>BB</b> <b>BB-</b>	Entities with some ability to meet their present liabilities, likely to be significantly affected by adverse economic conditions or changing circumstances.
<b>B+</b> <b>B</b>	Entities with vulnerable ability to meet their financial commitments, with risky future.
<b>B-</b> <b>CCC</b>	Highly risky and unstable entities with very low probability of meeting their financial commitments.

Credit risk is minimized at Prima banka by applying the following:

1. Active monitoring;
2. Early identification of non-performing loans;
3. Rating scale expressing the probability of a debtor's default;
4. Credit procedures;
5. Credit security (bank price fixing);
6. Internal review;
7. Credit limits system;
8. Black list, watch list and information from the Credit Registry and Social Insurance.

The quality of amounts due from banks and loans and advances to customers that are not impaired and are not overdue, prior to the deduction of provisions according to the Bank's internal rating:

Rating scale	Due from banks		Loans and advances to customer, of which:			
	30.9.2021	31.12.2020	Public administration		Other clients	
	2 805	2 927	30.9.2021	31.12.2020	30.9.2021	31.12.2020

Rating B	283	649	0	0	274	410	63	80
Rating B-	0	289	0	0	80	70	47	78
Rating CCC	0	0	0	30	26	49	71	124

Credit risk associated with the securities portfolio is low as the majority of purchased debt securities are government bonds issued by EU countries. As at 30 September 2021, the exposure to bank and corporate debt securities amounts to € 69 905 thousand (31 December 2020: € 70 276 thousand).

### c) Risk Monitoring - Limit Setting

Prima banka monitors and evaluates counterparty limits and their use on a daily basis. The Bank reviews whether the limits have been met or exceeded and decides on further steps pursuant to internal rules. Limits are set according to segments, sectors, products and collateral.

The Bank ensures on an ongoing basis that its asset exposure net of the effects of credit risk mitigation, including the date of origin of asset exposure, does not exceed the higher of a) 25% of the Bank's regulatory capital and b) the limit for banks or bank groups towards an institution, and towards a group of economically-linked parties where at least one of the parties is an institution, if the sum of values of the Bank's asset exposures net of the effects of credit risk mitigation towards all other parties that are members of the group of economically-linked parties and that at the same time are not institutions, does not exceed 25% of the Bank's regulatory capital.

Bank limit: Prima banka monitors and evaluates compliance with limits for bank entities separately. Limits are set as the absolute maximum amount of exposure to the relevant counterparty.

Country limit: Prima banka monitors and evaluates compliance with country limits separately. Limits are set as the absolute maximum amount of exposure to the relevant counterparty.

#### **d) Credit Risk Concentration Risk – Procedures and Methods Used for Credit Risk Concentration Hedging**

For the purposes of the Bank's credit risk management strategy and related banking instructions, Prima banka considers concentration risk to be the risk arising from concentrating the Bank's transactions (asset exposure) with an individual, a group of economically-related parties, the state, a geographic area, or an economic sector.

The limits of asset exposure are expressed as shares of the Bank's own funds, which limit exposure in relation to the size of the Bank. The upper limit of the total exposure of the Banking and Trading Books corresponds with the limits stipulated by the CRR.

The table below provides an analysis of credit risk exposure by industry segments as at 30 September 2021 and 31 December 2020:

	30.9.2021	31.12.2020
Agriculture, forestry and fishing	318	279
Mining and quarrying	0	0
Manufacturing	2 937	3 804
Electricity, gas, steam and air conditioning supply	3 276	3 718
Water supply; sewerage and wastewater management	2 229	2 715
Construction	3 278	3 254
Wholesale and retail trade	99 303	16 199

Arts, entertainment and recreation	4 268	5 683
Other activities	543	332
Activities of households as employers	3 762 239	3 253 917
<b>Total</b>	<b>4 219 504</b>	<b>3 833 646</b>

#### **e) Identification of Impaired Assets (Mainly Receivables)**

In respect of impaired assets, Prima banka has stipulated related rules and procedures in its internal regulations. The rules for identifying impaired assets are based on the rules specified in the NBS's Decrees, related internal regulations, and International Financial Reporting Standards.

The summary below provides an analysis of the unimpaired loan portfolio (stage 1 and stage 2) based on days overdue as at 30 September 2021 prior to the deduction of provisions:

	Within maturity	Up to 90 days	From 91 to 180 days	From 181 days to 1 year	More than 1 year	Received collateral to defaulted loans
Loans and deposits with other banks	2 805	0	0	0	0	0
Loans and advances to customers, of which:	4 262 560	16 733	190	0	0	10 022
Public administration	129 783	193	0	0	0	0
Other clients	3 805 927	15 908	189	0	0	9 883
Individuals	326 850	632	1	0	0	139
<b>Total</b>	<b>4 265 365</b>	<b>16 733</b>	<b>190</b>	<b>0</b>	<b>0</b>	<b>10 022</b>

The summary below provides an analysis of the unimpaired loan portfolio (stage 1 and stage 2) based on days overdue as at 31 December 2020 prior to the deduction of provisions:

	Within maturity	Up to 90 days	From 91 to 180 days	From 181 days to 1 year	More than 1 year	Received collateral to defaulted loans
Loans and deposits with other banks	2 927	0	0	0	0	0
Loans and advances to customers, of which:	3 871 075	13 411	11	0	0	8 737
Public administration	130 127	163	0	0	0	0
Other clients	3 293 851	11 408	10	0	0	8 416
Individuals	447 097	1 840	1	0	0	321
<b>Total</b>	<b>3 874 002</b>	<b>13 411</b>	<b>11</b>	<b>0</b>	<b>0</b>	<b>8 737</b>

The summary below provides an analysis of the impaired loan portfolio (stage 3) as at 30 September 2021, including other receivables from financial transactions:

	Public sector	Retail clients	Other clients	Total
Impaired loans	289	28 360	52 191	80 840
Provisions	145	21 587	52 191	73 923
Recoverable amount of collateral received	0	6 657	0	6 657
% of coverage by provisions	50%	76%	100%	91%
% of coverage by provisions and received collateral	50%	100%	100%	100%
Interest income on impaired loans	x	x	x	0

The summary below provides an analysis of the impaired loan portfolio (stage 3) as at 31 December 2020, including other receivables from financial transactions:

	Public sector	Retail clients	Other clients	Total
Impaired loans	216	35 933	56 577	92 726
Provisions	108	27 916	56 666	84 690
Recoverable amount of collateral received	0	7 895	181	8 076
% of coverage by provisions	50%	78%	100%	91%
% of coverage by provisions and received collateral	50%	100%	100%	100%
Interest income on impaired loans	x	x	x	300

## Restructuring

The Bank may modify the repayment terms of its loan receivables if the client's financial position is weak and the client will be unable to repay its liabilities to the Bank at agreed time.

For overdraft loans, the loan agreements may be transformed into instalment loans. In extraordinary circumstances, an overdraft loan may be extended but with the use of a gradual reduction. For instalment loans, repayment schedules are modified if a client is unable to keep to the agreed-upon deadlines.

The carrying amount of credit receivables whose contractual terms and conditions were amended due to their non-payment or the customer's impaired financial condition was € 24 148 thousand as at 30 September 2021 (31 December 2020: € 1 707 thousand).

The Bank sold real estate pledged against receivables which were unpaid as at 30 September 2021 for € 3 151 thousand (31 December 2020: € 3 892 thousand). The Bank sold a pledge over moveable assets (receivables) as at 30 September 2021 for € 0 thousand (31 December 2020: € 0 thousand).

## f) Description of the Procedures and Rules of Acceptable Collateral Acceptance and Valuation

The procedures and rules for the collateral acceptance and valuation have been specified in Prima banka's internal regulations. Collateral is used to minimise the Bank's credit risk and constitutes a secondary source of credit repayment. Collateral should guarantee repayment of the Bank's receivables arising from credit transactions if a debtor becomes insolvent due to the deterioration of his financial position. Collateral has both financed and non-financed form.

Financed collateral means the right of lien (on immovable assets, movable assets, receivables, cash collateral, securities, etc.). The Bank accepts various forms of collateral depending on a debtor's creditworthiness and

collateral quality. Prima banka determines individual acceptance values of collateral on the basis of professional experience and historical results.

Prima banka's right of lien on collateral instruments is constituted by a written agreement, which is an inseparable part of a loan agreement. The agreement contains terms and conditions governing the implementation process and termination of the lien.

Non-financed collateral means a guarantee by third parties (state guarantee, bank guarantee, corporate guarantee, or personal guarantee). This collateral's effectiveness is subject to a commitment of unconditional debt assumption if the primary debtor is in default. Such a commitment is stipulated in a written agreement with the guarantor. Other instruments used by Prima banka to manage credit risk include a notarial deed, promissory note, insurance, and comfort letter.

The collateral held by Prima banka must comply with legal regulations, be enforceable in court, be of good quality, and comply with maximum liquidity requirements so that a yield from the collateral covers the highest possible amount of a customer's liabilities arising from a granted credit product. The collateral instruments held are listed in Note 29 (1). When valuating collateral, Prima banka takes into consideration the collateral's general value set by a court expert in an expert opinion (immovable assets, movable assets), the carrying amount maintained in the customer's accounting books (receivables, stock, new movable assets), and the market value (securities).

The following principles are applied when accepting and valuing collateral:

- Collateral is considered a secondary source of loan repayment;
- The required collateral amount/value depends on the level of accepted credit risk. Unsecured loans are typically only used for operational financing and for small amounts;
- The physical inspection of collateral is performed by a front-office employee (primarily for commercial real estate) who prepares a report on such an inspection;
- A real estate collateral valuation is prepared by a court expert and revalued by a bank supervisor;
- Real estate revaluation depends on conditions on the Slovak real estate market. Prima banka responds to significant changes in the real estate market by revaluating held collateral;
- The asset to be financed is usually required to be used as collateral.

## **2. Market Risk**

### **a) Information on Market Risk Policy and Management**

As regards market risk, Prima banka only takes into consideration interest and currency risk. Share and commodity risk is insignificant as Prima banka's approved strategy does not allow such instruments to be purchased for the Bank's portfolio due to the high risk. Exposure to equities, which Prima banka includes in the Banking Book, is very limited and they are not held for capital gain purposes. When valuing these exposures, Prima banka uses an equity method or recognizes them at their nominal value.

The market risk management system arises from the provisions of the CRR, the Banking Act and the related Decrees of the National Bank of Slovakia on prudent banking, risk management, and bank liquidity management.

Market risk management rules at Prima banka are primarily specified in internal documents that have been approved by the statutory body and contain the key targets, principles and procedures for market risk management. The responsibility for market risk management is assigned to the ALCO Committee, which makes decisions based on the underlying data provided by the relevant departments.

In order to manage the Trading Book and the Banking Book and to measure and monitor the market risk, Prima banka uses the Value at Risk method ("VaR"), a gap analysis and calculation of net present value ("NPV") or changes in NPV at a parallel and non-parallel shift in the yield curve. Prima banka uses a standard method as defined in the CRR to report and calculate its regulatory capital to cover market risk.

### **b) Interest Risk**

Prima banka manages interest risk with respect to the current and expected situation in the market by adjusting the assets and liabilities structure in terms of the type of interest rate and maturity of new transactions. In line with the approved strategy, the Bank does not perform transactions that would meet conditions for including them in the Trading Book. The position in the Trading Book is zero.

To measure the Banking Book's interest risk, Prima banka uses the VaR method on a weekly and a monthly basis at the 99% reliability interval. The interest risk of the Banking Book is measured based on estimated changes to the Net Present Value (NPV) positions caused by changes in market interest rates. The method is based on a gap

analysis of the Banking Book positions. In addition, estimated changes to NPV positions in the Banking Book are calculated at a parallel shift in the yield curves of +/- 100, +/- 200 and +/- 300 basis points, including an opportunity for a non-parallel shift of the yield curve, and above all positions in the portfolio of financial assets at fair value through profit or loss at a parallel shift in the yield curves by +/- 100 basis points. Using back testing, Prima banka compares estimated VaR with changes to NPV positions caused by interest rate fluctuations on a weekly and monthly basis and evaluates the back testing results once a year.

Demand deposits (current accounts and term deposits accounts) are mapped by the Bank by time bands 1 month – 6 years. The Bank uses an internal model for the mapping, and it is performed automatically in the data warehouse based on the approved model. The Bank classifies demand deposits into bands with a longer maturity than those that correspond to interest rate sensitivity. The mapping is based on the historical monitoring of movements in balances and the probability that the fulfilment of the relevant liabilities will not be requested (back testing).

The estimated change in the NPV positions in the Banking Book resulting from the interest rate fluctuation is quantified in the following table, assuming a negative movement of the yield curve to the detriment of the Bank by -100 basis points.

The impact of a change in the present value of assets and liabilities due to a change in the interest rate for euro positions as at 30 September 2021:

	<b>Movement in yield curve</b>	<b>Bank's loss from movement in yield curve</b>
Banking Book: euro	- 100 BP	(48)
<b>Total</b>		<b>(48)</b>

The impact of a change in the present value of assets and liabilities due to a change in the interest rate for euro positions as at 31 December 2020:

	<b>Movement in yield curve</b>	<b>Bank's loss from movement in yield curve</b>
Banking Book: euro	-100 BP	(10)
<b>Total</b>		<b>(10)</b>

In terms of the Bank's overall position, the positions in other currencies are insignificant. A potential effect of movements in the yield curve on the Bank's profit/loss with respect to other currencies is insignificant.

The following table presents information on the balance sheet amounts of financial assets and liabilities per interest rate fluctuation risk. The assets and liabilities with a fixed interest rate are classified according to maturity date. The assets and liabilities with variable interest rates are listed according to the date of the anticipated closest change in interest rates. The Bank uses an internal model to classify demand deposits and savings deposits. Assets and liabilities without a contractually agreed maturity date and those that bear no interest are classified as "Unspecified items".

## Financial assets and liabilities according to the risk of interest rate fluctuations as at 30 September 2021:

	Up to 3 months including	3 to 12 months including	1 to 5 years including	More than 5 years	Unspecified items	Total

**c) Liquidity Risk**

Liquidity risk is the risk of a potential loss of the ability to pay one's liabilities as they mature. It is in the interest of the Bank to maintain permanent solvency, i.e. the ability to settle liabilities duly and on time, and to manage assets and liabilities to ensure the Bank always has sufficient liquidity.

Prima banka monitors liquidity risk via external and internal liquidity indicators and warning signals. From the externally defined liquidity indicators, the liquid assets indicator may not be lower than 1. During the past months of 2021, the Bank complied with the above legislative indicator with a sufficient cushion.

NSFR indicator (indicator of net stable funding) as at 30 September 2021 is 165.22 %. The amount of stable financing is € 3 787 297 thousand and the amount of required stable financing is € 2 292 267 thousand.

Internal liquidity indicators include but are not limited to: seven-day liquidity indicator, global indicators of short- and long-term liquidity.

Liquidity warning signals include to: amount of the volatile part of demand deposits, Loan to Deposit (loans provided in relation to the primary deposits), daily or weekly capital decrease, weekly increase in retail loans or monthly increase in loans provided to customers, the amount of liabilities of selected foreign currencies in relation to the total volume of the Bank's liabilities.

The method for measuring liquidity risk is based on the measuring of net and accumulated cash flows in the relevant time bands for all balance sheet and selected off-balance sheet items. Prima banka has prepared basic and alternative scenarios and a contingency plan - crisis scenarios. The Bank maintains its sound and sustainable development by observing its liquidity limits and managing its balance sheet structure.

The table below provides an analysis of the earliest possible contractual maturity of assets and liabilities by current residual maturity as at 30 September 2021:

	Up to 3 months including	3 to 12 months including	1 to 5 years including	More than 5 years	Unspecified items	Total

The summary below provides the worst-case scenario of an analysis of the contractual maturity of contingent liabilities and other off-balance sheet items as at 30 September 2021 (in undiscounted values):

Contingent liabilities and other off-balance sheet items:	Carrying amount	Contractual cash flows	Up to 3 months including	From 3 months up to 1 year including
Contingent liabilities from guarantees	6 748	6 748	6 748	0
Loan commitments, of which:	212 088	212 088	212 073	15
irrevocable	212 088	212 088	212 073	15

The summary below provides the worst-case scenario of an analysis of the contractual maturity of contingent liabilities and other off-balance sheet items as at 31 December 2020 (in undiscounted values):

Contingent liabilities and other off-balance sheet items:	Carrying amount	Contractual cash flows	Up to 3 months including	From 3 months up to 1 year including
Contingent liabilities from guarantees	7 234	7 234	7 234	0
Loan commitments, of which:	183 466	183 466	183 226	240
irrevocable	183 466	183 466	183 226	240

#### d) Exchange Rate Risk

The Bank continued to apply conservative exchange rate risk management in accordance with the set limits. Foreign exchange positions of the Banking Book were open to a minimum extent, and only as a result of the standard operating activities of the Bank. The Bank did not enter into any speculative transactions regarding exchange rate movements for clients or on the Bank's account. During the nine months of 2021, the Bank did not have any speculative foreign exchange positions open in its Trading Book.

When measuring the exchange rate risk of the Banking Book and the Trading Book, Prima banka uses the VaR method on a daily basis at the 99% reliability interval. As at 30 September 2021, the VaR amounted to € (183) (31 December 2020: € (680)).

In addition to monitoring VaR limits, the Bank has defined an internal limit for an individual open position in a given currency in absolute terms and a limit for the sum of absolute values of open positions in absolute terms for all currencies together.

Foreign exchange position of Prima banka as at 30 September 2021:

	EUR	CZK	USD	Other	Total
Assets	5 299 740	144	16 516	1 458	5 317 858
Liabilities and equity	(5 299 740)	(144)	(16 516)	(1 458)	(5 317 858)
<b>Net balance sheet foreign exchange position</b>	<b>0</b>	<b>0</b>	<b>(0)</b>	<b>(0)</b>	<b>(0)</b>
Off-balance sheet assets	5 035 545	36	0	31	5 035 612
Off-balance sheet liabilities	(308 003)	(47)	(3 907)	(75)	(312 032)
<b>Net off-balance sheet foreign exchange position</b>	<b>4 727 542</b>	<b>(11)</b>	<b>(3 907)</b>	<b>(44)</b>	<b>4 723 580</b>
<b>Net foreign exchange position</b>	<b>4 727 542</b>	<b>(11)</b>	<b>(3 907)</b>	<b>(44)</b>	<b>4 723 580</b>

Foreign exchange position of Prima banka as at 31 December 2020:

	EUR	CZK	USD	Other	Total
Assets	4 513 546	229	14 710	1 544	4 530 028
Liabilities and equity	(4 513 635)	(209)	(14 710)	(1 474)	(4 530 028)
<b>Net balance sheet foreign exchange position</b>	<b>(89)</b>	<b>20</b>	<b>(0)</b>	<b>69</b>	<b>0</b>
Off-balance sheet assets	4 228 755	1	1	1	4 228 758
Off-balance sheet liabilities	(273 113)	0	(430)	(3)	(273 546)
<b>Net off-balance sheet foreign exchange position</b>	<b>3 955 642</b>	<b>1</b>	<b>(429)</b>	<b>(2)</b>	<b>3 955 212</b>
<b>Net foreign exchange position</b>	<b>3 955 553</b>	<b>21</b>	<b>(429)</b>	<b>67</b>	<b>3 955 212</b>

Based on back testing, Prima banka compares estimated VaR with the change to the fair value of the instruments on a daily basis and evaluates back testing results once a year. Prima banka compares the individual limit of an open position in a given currency in absolute terms with the open FX position on a daily basis.

The Bank performs stress testing quarterly. The Bank tests euro depreciation and appreciation scenarios against other foreign currencies by 3%, 8%, and 10%. Considering the minimum open foreign exchange positions for individual foreign currencies from the beginning of 2021, the impact of fluctuations in exchange rates on the Bank's profit/loss is insignificant.

To manage its FX position the Bank uses spot deals on the interbank market.

#### **e) Equity Risk**

The Bank's strategy is to not actively trade equity instruments, as evidenced by the size and structure of the equity securities portfolio. In "Financial assets at fair value through other comprehensive income" and "Financial assets at fair value through profit or loss" portfolio, the Bank records equity securities in the total amount of € 4 375 thousand, which are capital participations in SWIFT LA Hulpe, Belgium and VISA Inc. USA.

#### **f) Commodity Risk**

The Bank is not exposed to commodity risk. In line with the Bank's strategy, the Bank does not carry out transactions with commodities and has no exposure to commodities.

### **3. Operational Risk**

Operational Risk is the risk of financial and non-financial impacts resulting from inadequate or missing internal processes/actions of staff/system or external events. Operational risk includes legal risk but excludes strategy risk.

Prima banka manages operational risks in line with the operational risk management strategy approved by the Bank's Management Board. The operational risk management comprises OR identification, assessment, monitoring and management/mitigation methods. Operational risk management is aimed at optimizing the Bank's risk profile at acceptable costs.

Operational risk is identified using risk analyses when preparing new products, new processes, non-standard transactions, implementing new information technologies/information sources, project management, and business continuity planning. The Bank monitors and analyses key risk indicators and records and analyses all operational risk-related events. Residual risk is identified during the Risk and Control Self-assessment process.

If an operational risk event or another operational risk instance is identified, action plans are usually adopted to eliminate or mitigate the occurrence of operational risk. To mitigate the financial impact of the occurrence of events, the Bank has concluded numerous insurance policies that cover the main risks.

The Bank uses a standardized approach in accordance with the CRR to calculate regulatory capital requirements for operational risk, according to which the requirement is currently € 12 006 thousand, of which the following amounts are attributable to individual business lines: retail banking: € 6 433 thousand, commercial banking: € 4 392 thousand, payment services and settlement: € 73 thousand, other: € 1 108 thousand. Management measures and implemented systems for operational risk management are adequate for the Bank's strategy and profile.

### **30. Transactions with Related Parties**

Under IAS 24 "*Related Party Disclosures*" a related party is a counterparty that:

- a) Directly or indirectly through one or more intermediaries, has control over or is under joint control with the reporting entity (including parent companies, subsidiaries and fellow subsidiaries);
- b) Is an associate;
- c) Is a joint venture;
- d) Is a member of key management personnel of the reporting entity or its parent company; and
- e) Is a close member of the family of any individual referred to in letter a) or d).

When considering relations with each related party, attention is paid to the nature of the relation, not only to its legal form. Transactions with related parties were made under standard conditions and at market prices. Included in assets, liabilities, expenses, revenues and off-balance sheet items are the balances with the parent company Penta Financial Services Limited, Cyprus, with other companies of the Penta Investments Group ("Penta Group"), the members of the Board of Directors and Management Board, and other related parties pursuant to IAS 24.

## Assets and liabilities concerning related parties as at 30 September 2021:
